CORE SKILLS

Data

Python · R · statistics · machine learning

Reporting

Typst · Quarto · HTML/CSS/JS

Tooling & Others

Git · CI/CD · Rust

OPEN-SOURCE WORK

Creator and maintainer of open-source Python and R libraries for data visualization, reporting, and developer tooling, accumulating **1,000+ GitHub stars** and nearly **1 million downloads**.

EDUCATION

MSc, Applied Mathematics & Statistics

University of Bordeaux · 2022-2024

BSc, Economics

University of Bordeaux · 2019-2022

LANGUAGES

French: Native

English: Professional

PROFESSIONAL EXPERIENCE

Independent Data Consultant

Since 2024

Yellow Sunflower

- Design automated reporting systems that transform spreadsheets, databases, APIs, and operational data into reliable PDF and web outputs.
- Develop and maintain open-source Python and R libraries focused on reporting, visualization, and reproducible workflows.
- Talks and trainings at international events

Co-creator

Since 2024

Matplotlib Journey

- Co-created matplotlib-journey.com with Yan Holtz, a leading data visualization specialist.
- Enrolled 600+ students worldwide since launch.
- Built a complete interactive learning platform featuring in-browser Python sandboxes, hands-on lessons, quizzes, and zero-install coding powered by Pyodide.

Data Science and Open Source Intern

Mar 2024 - Aug 2024

Dataviz Universe

- Developed open-source software for data analysis, including Lifelihood, an R package for ecology modelling, and the first version of pypalettes.
- Created advanced Matplotlib visualizations and applied information-design principles to communicate data clearly.
- Developed and improved content and tooling for the Python and R Graph Gallery websites.

Data Science Intern - E-commerce

Aug 2023 - Jan 2024

Wanteed

- Queried, cleaned, and transformed product and customer data with BigQuery SQL.
- Built interactive Looker dashboards and defined business KPIs.
- Developed and implemented predictive models in Python using Google Colab.

Freelance Data Visualization & Web Dev

May 2023 - Aug 2023

R Graph Gallery · Python Graph Gallery

- Delivered data visualization and web-development projects while completing a master's degree, averaging 10 hours per week.
- Improved educational chart examples and supporting website content for Python and R audiences.

Research Intern - Socio-economics

May 2022 - Jul 2022

CIERI, Bordeaux

- Investigated relationships between socio-economic status and cancer through literature review and quantitative analysis.
- Applied statistical inference and unsupervised learning methods in R.
