

1. Validation proposal

This proposal is an ordinary Typst-generated PDF. It intentionally has no PDF/A conformance target so both validators can exercise their noncompliant document paths.

1.1. Scope

- Metadata inspection
- Embedded-font inspection
- Colour and graphical-content inspection
- Link annotation inspection

The reference implementation is veraPDF.

1.2. Expected result

The file parses successfully and fails the selected PDF/A-1b profile.
